

inspired THINKING institute Pty Ltd

Enlightened Executives, Entrepreneurs & Individuals

VISION: To have a world of peace and prosperity for everyone on this planet.

MISSION: To create initiatives that are of the greatest service to the largest number of people in the shortest amount of time using the most effective plans and strategies.

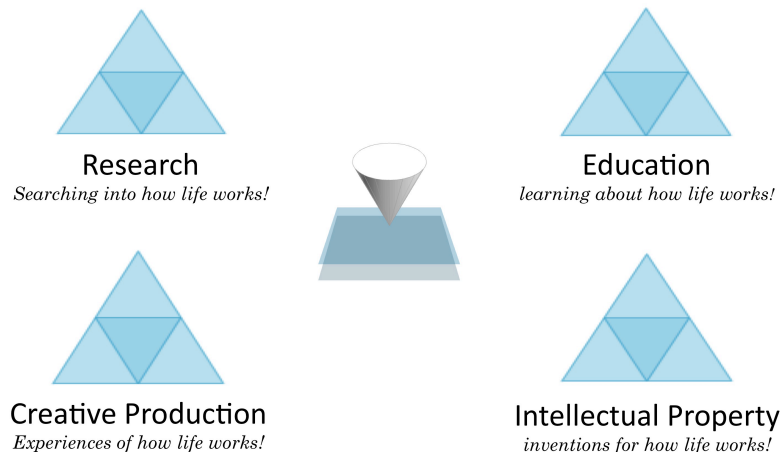

The Institute is developing a curriculum of courses trainings, programs and consulting services. The programs have been created to particularly empower the productivity, performance and well being of enlightened executives, entrepreneurs and individuals.

The programs are based on accessing our inspired intuitive intelligence. This facilitates a shift in awareness to take you beyond the confines and limitations of your own mind into the intelligence of the heart. This is explored from the point of view of scientific and metaphysical reality. The brain is capable of almost a limitless combination of connections. The innate neuroplasticity of the brain generates an endless creative potential for rewiring and recharging the brain.

"Our bodies contain more than 60 trillion cells, all inter-related, interconnected and interdependent. Each cell is also an individual, conscious living organism that has learnt to cooperate to create this 'universe' we call a human body. In the same way, humanity is made up of billions of individual 'carbon units' or 'cells', called human beings that also must learn to cooperate to create and sustain the Planetary Body. This body is afflicted with many 'diseases' at this time and is needing the healing energy of love via our dedicated conscious, ongoing awareness, understanding and service." Anatole Petrovich Kononewsky

The inspired THINKING institute aims to:

- facilitate a greater understanding of the true purpose of life;
- awaken the inner intelligence of the heart and spirit;
- increase the productivity, creativity and capacity of the mind;

The inspired THINKING institute is focused on understanding how life manifests and how we bring ideas into reality. It explores how we can awaken the innate, limitless potential of the mind through using the hidden power of meditation, ancient spiritual practices and the intelligence of the heart.

It also seeks to demonstrate how metaphysical principles and esoteric wisdom can be practically applied at an individual, business, family, community, national and international level to improve the wellbeing, quality and prosperity of all our lives.
